- Private sale & Public sale offering
- VC incubation offering
- Marketing packages
- KlaytnPad Socials

So, let's get started!

INTRODUCTION TO KLAYTNPAD

KlaytnPad is a fully automated launchpad for all Klaytn Network projects. At KlaytnPad you will get a chance to be a part of unique and different types of projects like DeFi, blockchain gaming, NFTs and all those projects which utilize blockchain for all of us.

KlaytnPad will help speeding up the launch of those new and amazing projects by raising the amount for them. We strongly believe in quality projects so we try to bring forward the kind of projects that are potentially strong and are backed up by a good and experienced team. In this way, you guys will always get a chance to invest in one of the best projects and will never regret doing it.

WHAT IS \$KPAD?

\$KPAD is the native token of KlaytnPad built on the Klaytn Network. It will allow you to participate in presale activities. You'll participate in initial offerings and will be able to purchase different projects' tokens at discounted or initial launching price. You'll need \$KPAD tokens in your web3 wallet i.e (metamask) according to our three tiers system. Your allocation will depend on the amount of \$KPAD tokens you have according to our three tiers system

Once you hold \$KPAD tokens in your wallet, you will be able to participate in FCFS Rounds of IDO fundraising Project tokens event according to your eligible Tier.

Also, a locking system is implemented due to which the users will be able to lock their \$KPAD tokens as well as their \$KPAD LPs.

INCUBATING DEVELOPMENT ASPECT OF PROJECT

KlaytnPad will incubate the most unique and promising projects for during its development. The development phase of a project is one of the most complex phases so we try to become a helping hand for the projects during its developments so that they can provide great value to the people out there. We at KlaytnPad will also allow the projects to raise capital and at the same time it will help investors to gain early access to token sales of that particular project. This usually results in purchasing tokens at a reduced price before they hit the markets and it is beneficial for both project and investors.

INCUBATING STRATEGY ASPECT OF PROJECT

We will help growing the projects by introducing some amazing strategies. We will try to help as much as possible when it comes to the strategy of the project because a project can only survive in the market if it is working on a good, well-planned and up to the mark strategy. So, our incubation for the strategy aspect of the project will allow the project to become one of the top projects in market in which people can put both their trust and their assets.

INCUBATING COMMUNITY ASPECT OF PROJECT

The projects can build up their community by getting our community incubation services. They can get some of the best and most active people in their community by using our services. A project can never flourish if it doesn't have a good and engaging community. So, keeping this in mind, we have this service for the projects and we are quite sure that it can help the projects in the most amazing ways.

PRIVATE SALE & PUBLIC SALE OFFERING

\$KPAD is the native token of KlaytnPad built on the Klaytn Network. It will allow you to participate in presale activities. You'll participate in initial offerings and will be able to purchase different projects' tokens at discounted or initial launching price. You'll need \$KPAD tokens in your web3 wallet i.e (metamask) according to our three tiers system. Your allocation will depend on the amount of \$KPAD tokens you have according to our three tiers system

Once you hold \$KPAD tokens in your wallet, you will be able to participate in FCFS Rounds of IDO fundraising Project tokens event according to your eligible Tier.

Also, a locking system is implemented due to which the users will be able to lock their \$KPAD tokens as well as their \$KPAD LPs.

VC INCUBATION OFFERING

KlaytnPad also offers VC incubation for the projects. With the help of VC incubation, the projects can aim towards a better future and they can really perform great in market. For any project, funding is something really important which can skyrocket the success and we know how to help the projects with VC incubation and make them achieve their goals.

MARKETING PACKAGES

There are some marketing packages that KlaytnPad offers. These packages help the project in the market exposure that they want and it also helps the project to build a strong and active community. You can choose the marketing packages as per your budget and needs and each package holds great value for the project. So, no matter what you choose, you will always get benefit out of it.

BASIC PLAN

The basic package is for those with a tight budget. It includes all the basic marketing stuff within a budget that anyone can afford.

Standard Package

In this package affordable yet beneficial packager, there are some really good marketing opportunities waiting for the projects. This is for those who want to spend a specific amount on their project marketing but still want

Advanced Package

Advanced package is for those who want unlimited benefits related to the project marketing and they have a good amount to spend on it as well.
